In 1881 I was told by two of the best physicians in Boston, Dr. W— and Dr. B—, that I could not expect to five a year; that I had Bright's Disease. At that time I heard of a man who was supposed to have been at death's doer and was stopping, or dying, at the Commonwealth Hotel (now the Langham), at the south end of Boston. His wife, in reading to him, came across a Warner advertisement and got a bottle of the Safe Cure. Her husband commenced to take the medicine, saying nothing to his dector until after two or three weeks. His water commenced to show sigus of improvement, and the man was able to get up and walk about. When he found that he was really getting better he told the doctor what he had done and dismissed him, continuing the medicine, and in three months this dying man was about his usual duties, those of an expressman, and was fincily cured. On the strength of this cure I got a bottle and dropped all other medicines. My doctors sent me to Kansas as a good place to go, out of their jurisdiction, and to die. They gave my wife medicine to carry, enough to last me until I should die, and which I left at home. I carried one dezen bottles of Warmer's Safe Cure, and went to a small place near Junction City, where I had a coushi who is a physician. I had him examine my waiter every day, and after a week he found improvement and honestiy acknowledged that I was on the road to recevery. And I did recover, although it took is took in the court of the last of the covery. and after a week he found improvement and hon-estly acknowledged that I was on the road to recovery. And I did recover, although it took a long time, because I was badly off, and I took over one hundred bottles in the course of a year and a half or two years. These facts can be proved by any one who knew me then, and I will willingly write to any one who may desire to know from me directly and give them a history of my case. Very truly yours. of my case. Very truly yours.
